The following questions were received and responses are provided:

- 1. What is the unit of measurement for dirt screening pricing?**
The dirt screening will remain as an hourly rate or as a cost per hour unit of measurement for pricing.
- 2. Are compaction services needed?**
Compaction is needed around the outer 18"-24" of any ring for events with horses but may be needed at other similar events as well.

Compaction can often times be completed using a skid steer and dirt should be compacted on every lift or layer of dirt that is installed, which is typically every 2"-3". The integrity and quality of dirt compaction is subject to the discretion of the event and event management.

On occasion, additional compaction may be required utilizing a roller or a walk behind unit. Pricing Item #6 and #7 have been added to the pricing section to obtain pricing for the possibility of additional compaction services.

Please download and utilized the revised bid document on the www.danepurchasing.com website. The title of the document includes "REVISED – 8/26/22" on it.
